Feature Overview

- Seamless Spotify Integration

- Match powered by The Echo Nest

- Automix Radio

- Sharing

- Cutting-edge Streaming Engine

- Professional Hardware Integration

- Desktop-class Audio FX

Seamless Spotify integration

Spotify integration in djay includes all of the user's existing playlists, starred tracks, and Inbox (to send real-time song requests to the DJ); powerful search capabilities, charts, browse (by genres, moods, DJs); and Match (for song recommendation).

Users can seamlessly switch between Spotify and their existing local iTunes library, as well as mix tracks from both of these sources simultaneously.

Choose *Spotify* via djay's library source selector
(Spotify / Music icon)

Browse by Playlists, Charts, Genres, Match
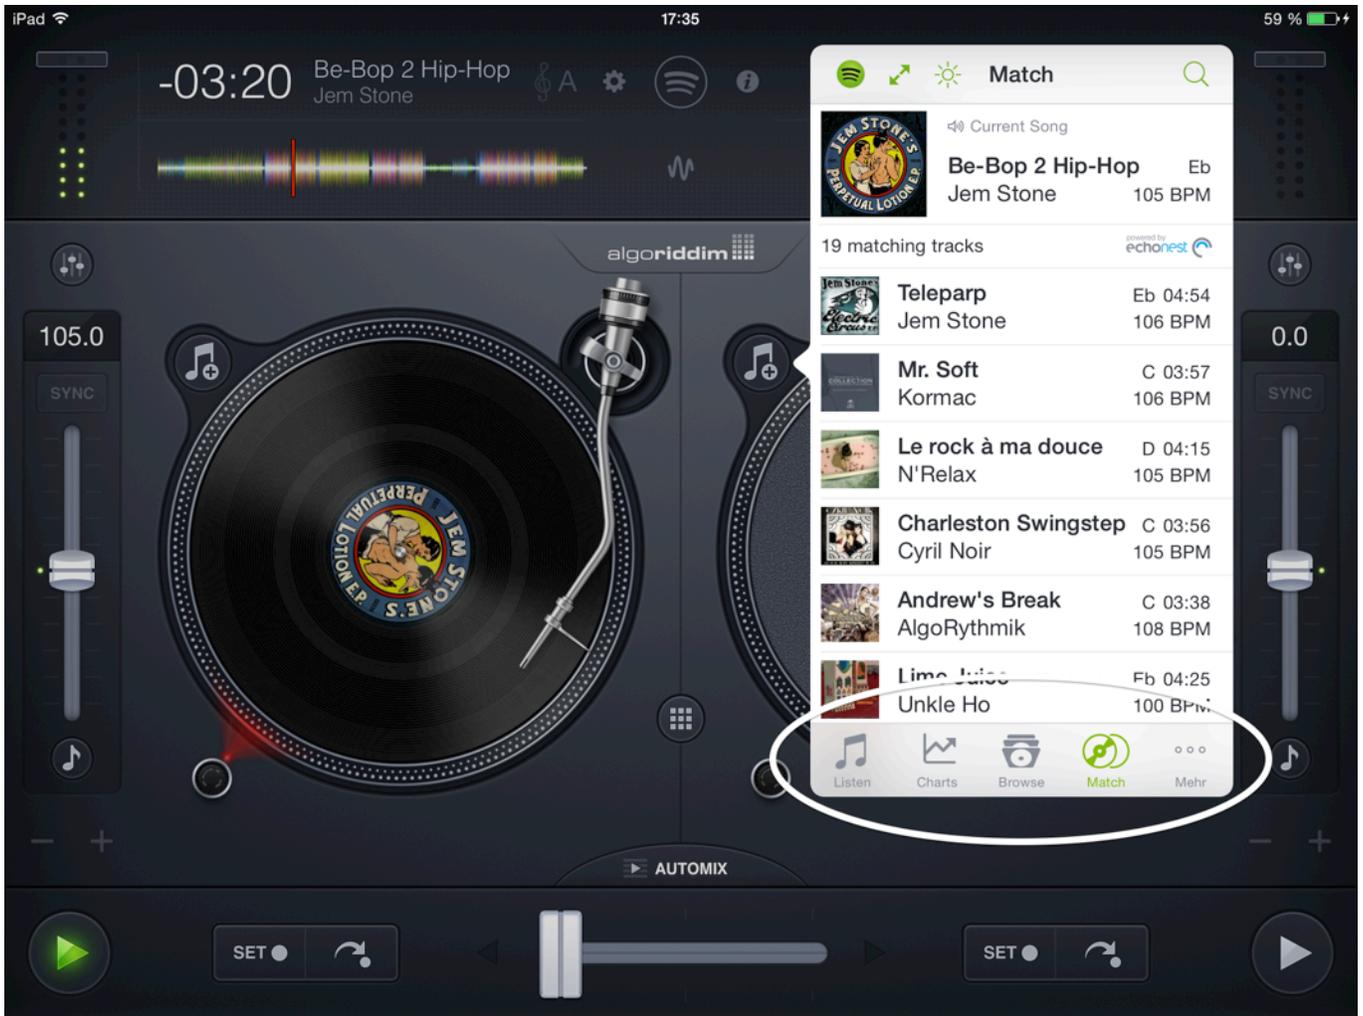

Powerful Search Capabilities
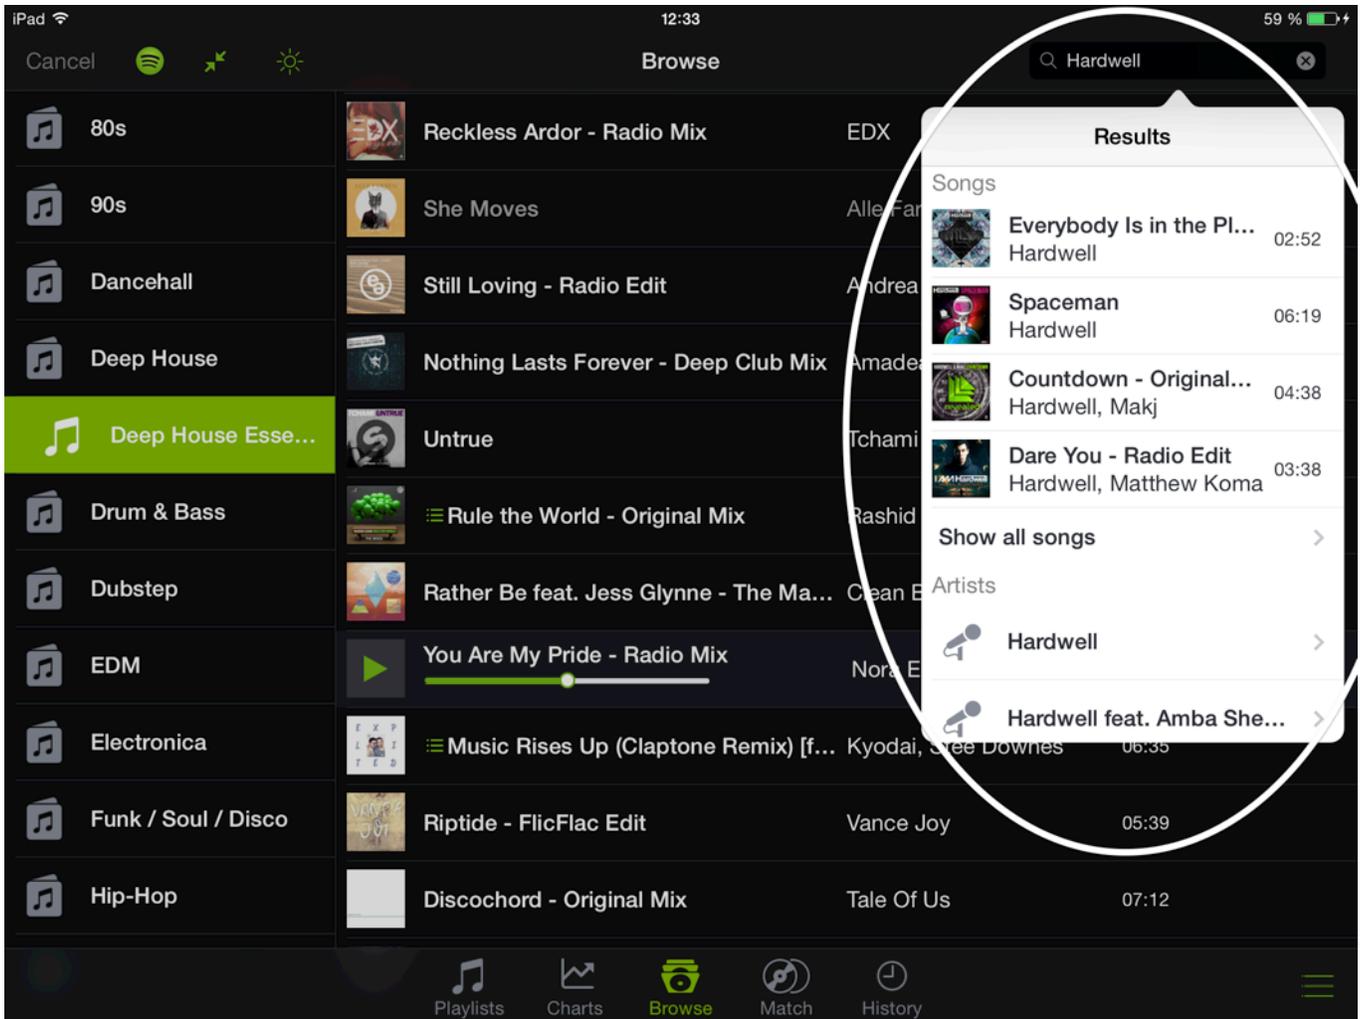

Switch between small and fullscreen library view
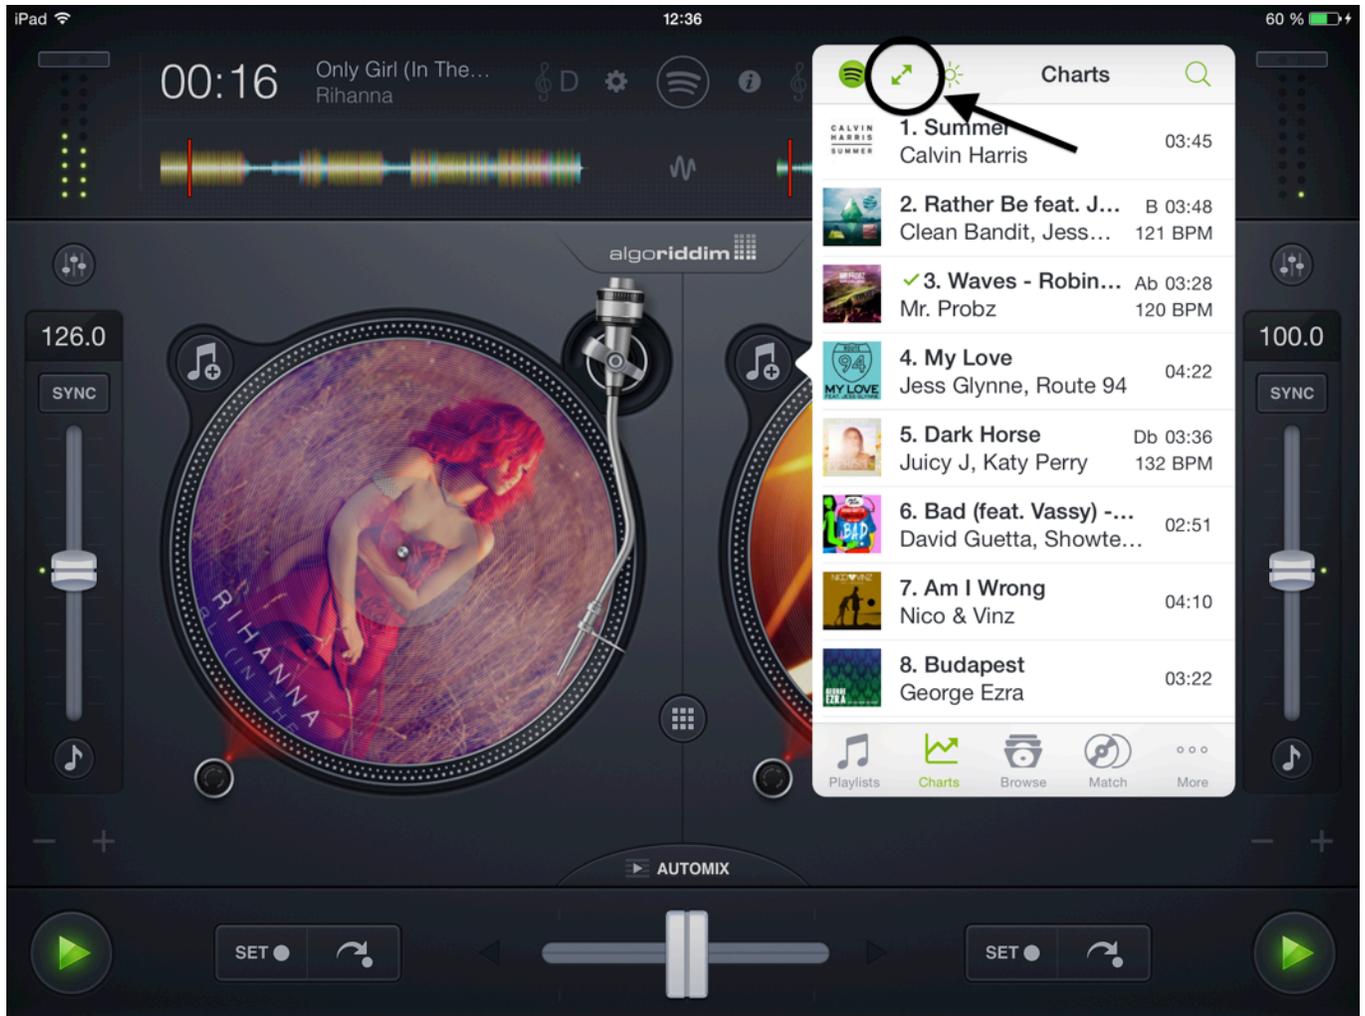

Adjust light / dark mode depending on your lighting environment

Swipe songs to add them to your Queue

Match
powered by The Echo Nest

Finding the perfect next track to mix has always been one of the biggest challenges for DJs, and it doesn't get easier when you've got millions of tracks to choose from. So we're introducing *Match*, an innovative, first-of-its-kind feature that recommends tracks that go well with what the DJ is currently playing - allowing users of any skill level to create professional sounding mixes. *Match*, powered by Spotify's recent acquisition The Echo Nest, provides unprecedented track recommendations based on danceability, BPM, key, music style, and how well the song mixes with the currently playing track.

Select the *Match* tab from djay's Spotify library

Automix Radio

For people who simply want to lean back and have a continuous music mix at their next party, the all-new Automix Radio in djay 2 picks tracks that go well with each other, but also automatically mixes these tracks for them with beat-matched, DJ-style transitions. This means users can step away and enjoy live DJ mixes based on their personal musical taste. All with the simple tap of a button.

Open the Automix panel

Enable *Automix Radio.*
Tap *Start Automix.*

Sharing

djay allows users to share their set lists as Spotify playlists via SMS, Email, Facebook, Twitter. so the rest of the world can listen to the tracks instantly or recreate a great set.

Open the session panel by tapping the *Spotify* icon
Save your session as a Spotify playlist

Share your session via SMS, Email, Facebook, Twitter

Share or star individual tracks

Professional Hardware Integration

djay supports a wide range of professional DJ gear, allowing users to mix tracks from the cloud using tactile knobs, buttons and jog wheels. Algoriddim's djay 2 app is powered by exclusive hardware from Pioneer, Numark, Vestax, Reloop, Philips, Casio, and Griffin. For the first time, Spotify Premium users are able to instantly mix millions of tracks on professional DJ hardware.
